

Snippet 1

- 1- try to run the code.
- 2- See that the terminal showed an error in the code: `a = "Hello"+1`, since it cannot combine an integer with a string.
- 3- Change it a string by adding quotes to the 1.

Snippet 2

- 1- Notice that the IDE was giving warning errors for the indentation
- 2- Indent and run the code.
- 3- Terminal projects that a colon is expected after line two.
